

Cereal Box Boomerang

Use this pattern to recycle a Cereal box into 2 returning boomerangs! If you print this on standard paper the boomerangs will be the right size for cereal box cardboard or chipboard. Or, print on label paper and stick to the card to make it easier to cut.

Hold the boomerang with the top of the wing toward you. Throw straight forward with a flick of the wrist to make it spin. Throw almost vertical and the boomerang will circle around for an easy catch! Your boomerang will make a circle of about 4-6 feet, and should be thrown in a large room, or outside on a calm day.
